

In the past 15 years, researchers have been releasing alarming statistics on a sharp and steady increase in kids' mental illness, which is now reaching epidemic proportions:

- 20% of children have mental health problems*
- 37% increase in teen depression*
- 100% increase in suicide rate over last 15 years*

With more and more school districts shifting their focus and implementing a mental health support system, Michiana Behavioral Health would like to be a part of the solution to this issue and a part of your support system.

By calling us first, we can help navigate your student's next move immediately! We are an emergency room for mental health issues. We can save the school time, save that student time and his/her family money, but most importantly, the student can receive immediate attention and care for his/her crisis.

When you have a patient in crisis, instead of sending the patient to a crowded Emergency Room, call us first! We are an ER for psych and behavioral issues.

Sending the patient to the ER when there is no medical necessity could result in increased out of pocket costs and a time delay, prolonging their psychiatric treatment, complicating an already stressful situation. *If there is a medical emergency or the patient needs medical attention, call 911 or go to the emergency room.*

Calling Michiana first, we can schedule a same-day, no-cost level of care assessment. This way, the patient is given the opportunity to receive immediate treatment, potentially avoiding urgent care, emergency room and/or ambulance bills.

CALL US and ask for our Assessment and Referral office to start the process right now.
